

2020

“MESSAGE FROM THE SHIPWRECKED IN A BOTTLE”

The year 2020 was presumed almost idyllic in the history of Itsasmendi. A year that awaited the inauguration of our new facilities in a magical corner of Urdaibai.

The paradox of life took us through an unthinkable storm to a desert island in March. The shipwreck to an island that was not on any map and that brought us closer from initial bewilderment and unease to reflection and adaptation in the long hours of waiting.

In Itsasmendi everything is almost never said, you can almost always look at things from more than one perspective, from new and different perspectives.

The construction of a new future with the writing of a message of humility and hope, in a bottle that crosses the sea and our ship does not pass by.

Learning from the past and thinking about the future, we are convinced that this message will permeate those who have always trusted us, those who do not have a specific destination and just want to enjoy the journey of new paths.

Winner of the Photography Contest held among the students of the School of Fine Arts

University of the Basque Country.
